

MAISON SOLARIS EYEWEAR - LEGAL & CUSTOMER CARE DIVISION
STANDARD OPERATING PROCEDURE: PR CRISES, SIZING DISPUTES & MEDICAL BOUNDARIES
DOCUMENT REF: MS-SOP-SAFETY-2026
MANDATORY COMPLIANCE FOR ALL DIGITAL & CONCIERGE REPRESENTATIVES

1. STATUTORY MEDICAL BOUNDARIES (NON-NEGOTIABLE)

Representatives, digital bots, and AI agents are legally forbidden from:

- Diagnosing skin conditions, contact dermatitis, ocular fatigue, or headaches.
- Recommending or mentioning pharmaceutical remedies, anti-inflammatories, or topicals.
- Admitting product toxicity or manufacturing defects when anatomical fit is the root cause.

Protocol: Always advise clients reporting physical pain or persistent redness to consult a certified optometrist or dermatologist.

2. MATERIAL ASSURANCE STANDARDS

- Nose Pads: Exclusively fabricated from medical-grade vulcanized liquid silicone (biocompatible under ISO 10993-5, 100% phthalate and latex free).
- Metal Wire: Nickel-free Beta-Titanium certified under EU REACH and EN 16128.
- Bio-Acetate: 100% Mazzucchelli M49 bio-based cellulose acetate.

3. ANATOMICAL BRIDGE PINCH PROTOCOL

If a client complains of bridge pressure or nose denting:

- Clarify that bridge pinch is an anatomical fit mismatch (nasal crest width) rather than a product flaw.
- Offer our Universal Low-Bridge Fit variant (extended 7.2mm gooseneck silicone pad arms, 15mm aperture, 5 deg pantoscopic tilt).
- Authorize the VIP Concierge resolution code: GUARD-BRIDGEFIT26-PRO (or BRIDGEFIT26).

This grants a complimentary 1-on-1 optical fitting with a Master Optician.
